

Ambient Weather RAINSPIKE Universal Bird Spike Kit for Rain Gauges

SKU: RAINSPIKE (rain gauge not included).

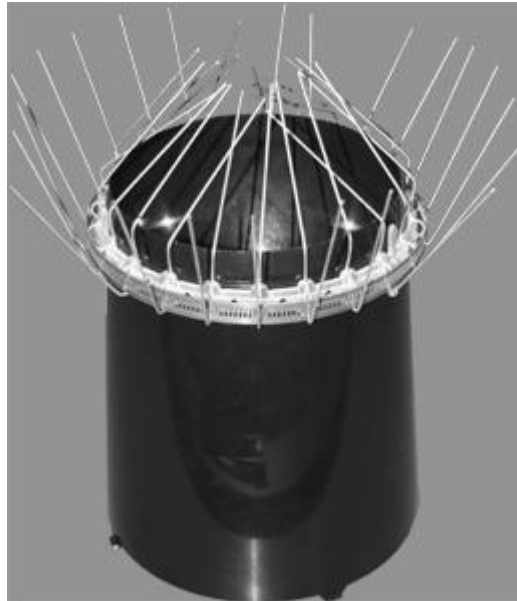

Figure 1

Birds are fond of weather station rain gauges. They are mounted in high locations, and are ideal for nesting. To protect your rain gauge from bird damage, install the easy to mount rain gauge spike kit from Ambient Weather.

Designed not to hurt the birds, the spikes provide a barrier to make it more difficult for birds to land on top of the rain gauge.

Compatible with the Davis VantagePro, VantagePro2, Weather Monitor II, Weather Wizard III and Rainwise Weather Stations.

Components

The MobileMount (**Figure 1**) component list is shown in **Table 1**.

Quantity	Description
1	Bird Spike Strip
1	Adjustable Band

Table 1

Instructions

1. Use gloves to install the bird spike kit to avoid injury.
2. Wrap the pre-sized bird spike and adjustable band around the top of the rain gauge, as shown in Figure 1.
3. Tighten the adjustable band around the rain gauge until secure.
4. Bend the bird spike strips up as shown in Figure 1 to prevent birds from landing on the rain gauge.
