Radar Detectors

RAD450

The RAD 450 comes pre-programmed for both **English & Spanish voice and text alerts**. Anti-Falsing Circuitry & Updateable In-Vehicle Technology (IVT) Filter not only reduces false alerts from blind spot systems, garage door openers and other radar detectors, but also eliminates erroneous alerts from sources like collision avoidance systems, so users hear just what they need to hear. The **bright OLED display** provides intuitive band identification and easy-to-understand alerts for an accurate and informed drive.

FEATURES:

- Radar/Laser Protection – Detects all radar signals (X, K and K bands signal strength indicated), laser and VG-2 signals
- VoiceAlert – English and Spanish voice announcements help keep your eyes on the road
- Instant-On Ready detects radar guns with “instant-on” (very fast) speed monitoring capabilities
- Laser Eye detects laser signals from both front and rear
- Anti-Falsing Circuitry:
 - Adjustable Sensitivity: Automatically reduce false alerts from erroneous sources including garage door openers and fixed position traffic flow monitoring systems
 - Updateable IVT Filter: Automatically reduces false alerts from moving In-Vehicle Technology sources such as collision avoidance systems and adaptive cruise control)
- Bright, easy-to-read OLED display for easy viewing in any lighting condition
- Dim Mode allows the user to dim the radar detector display enhancing night driving visibility
- Signal Strength Meter with Frequency Display Mode provides the user with relative proximity to the target and exact frequency being received
- Power Cord and Mount Included
