

Hy-gain ATB-65 Base Mount Assembly

Mounting Plate assembly

Assemble the Mast plate using the four u-bolts supplied. The plate has bends on each side for strength. The bends should be on the ground mast side. Holes are provided on the plate for ground attachment, make sure these hole are at the bottom. Attach the u-bolts using the 5/16 nuts and split washers. The upper u-bolt on each set should be used to hold the antenna. The lower u-bolt on each set should be used on the ground mast side and should have a saddle on each. Slide the abs insulators onto the bottom of the antenna. Leave enough of the antenna sticking out the bottom insulator so that a 10-24 bolt may be used to attach the coax lead to the main mast. Slide the mast plate onto the antenna an level the bottom of the antenna with the bottom of the mast plate. Make sure the top insulator does not interfere with the wire anchor that is just above it. Remember that the wire anchor will be slid down later to tighten the wires.
