

Miniature Travel Iambic Paddle

MFJ-561

Thank you for purchasing the MFJ-561 Miniature Travel Iambic Paddle. This tiny lightweight paddle is perfect for traveling or for home use with QRP or "big" rigs. Throw it in your briefcase along with your MFJ *QRPCub*TM or your other favorite transceiver.

The paddle is precision formed from special phosphorous bronze spring material with an A150 temper. This gives you an excellent feel so you can send smooth CW. It is mounted on stainless steel base with non-skid rubber feet. It has a four-foot cord and 3.5 mm stereo plug, where the left side of the paddle is connected to the tip of the plug and the right side to the ring of the plug.

Following the instructions supplied with your electronic keyer, connect the paddle to your keyer. Most operators hook up the left side of the paddle to the dot circuitry of the keyer, and the right side to the dash circuitry.
