

Mini Mobile Transceiver

**Radioddity *DB25-G***

**GMRS-Transceiver and NOAA-Receiver  
With external Speaker-Microphone**

Palm Size, PC Programmable, DTMF, 2 Tone, 5 Tone, CTCSS, DCS  
462-468MHz Transmit according to GMRS regulations

**USER'S MANUAL**

## About Radioddity

**“You, our friend and customer, are at the forefront of what we do.”**

Nothing is more important than your time, and your money. When buying radios online, you face a dilemma: Save time and purchase from a reputable website at a high price, or try to save money by purchasing from an un reputable dealer at the cost of your time spent dealing with quality and service issues. At Radioddity.com, you don't have to choose between low prices and a safe shopping experience. Whether you're a first time buyer or a seasoned HAM, we hope you'll find our products, prices, content and resources to be just what you need.

In the past several years, Radioddity has been better serving the needs of two-way radio buyers by creating a safe shopping experience. We do this by providing the highest quality products, at an affordable price, and backing that up with superior quality service. It sounds simple to us.

**That is our promise: to improve your buying experience.**

Through strong partnerships which allow us to bring you the latest technology from our own brand Radioddity and on behalf of our caring and responsive Customer Support team, we strive to fulfill that promise and better meet your needs every day.

Along with this promise, we hope to give you more value. Be that by offering you the latest and greatest in DMR and analog radios, accessories and related products, by providing superior technical support, or by working with thought leaders in the Amateur Radio Industry to develop enriching content to entertain and assist you in your buying process including our Blog, FAQ, and Newsletter. Your concerns are our concerns.

We do all of this to help you find the highest quality of radios, for low prices, with as little headache to the consumer as possible. If we are failing you in this promise in any way, let us know via email: [support@radioddity.com](mailto:support@radioddity.com)

## ■ ATTENTION!

Please observe the following precautions to prevent fire, personal injury, damage to the radio:

- Don't use this machine when driving, so dangerous.
- This radio is designed to use 13.8 V dc voltage, do not use the 24 V power supply to the the mobile radio.
- Please do not place the machine in the dust, moisture or water splashing.
- If there's any electromagnetic interference, please keep the mobile radio away from the sources such as TV set, engine generator etc.
- Do not expose the mobile radio to long periods of direct sunlight, for example on the dashboard of a vehicle or close to heating appliances.
- If the mobile radio generate any smoke or strange smell, please turn off the power supply immediately and make sure all is safe, then you can send the unit to the nearest after-sale center for inspection or repairment.
- Do not keep transmitting with high power output for too long time, which may lead to overheating and cause auto power off or failure.

## ■ PRODUCT INSPECTION

Welcome to use our mobile radio, before operation, it is recommended that you:

- Please check the package is in good condition without any damage.
- Please unpack the package box carefully and check that all items are included.
- If you find any items are missing or have been damaged during shipment, please contact your dealer immediately.

### Standard accessories

Mobile Radio

Speaker Microphone

Mounting Bracket

Cigar-plug Power Cable

Screws & Fuse

Programming Cable

## ■ PANEL DESCRIPTION

- 1 Power On/Off, Volume Knob
- 2 Mode Switch
- 3 Progress Knob, confirm key
- 4 Monitor
- 5 FM Radio
- 6 Display screen
- 7 Call key
- 8 A/B/C/D Switch, Emergency Alarm
- 9 Microphone Connector

- ① Data Input
- ② Null
- ③ MIC
- ④ MIC Ground
- ⑤ PTT.
- ⑥ GND
- ⑦ +8V DC Output
- ⑧ Null

- 1 PTT/Microphone/GND
- 2 DATA
- 3 Fan
- 4 Antenna connector
- 5 DC power supply

- ① GND
- ② SP
- ③ MIC
- ④ PTT

## Hotkey function guide

Power/Volume: Press the key to turn on the radio. Hold on the key for seconds to turn off the radio. Switch the knob to adjust the volume.

[ **CALL** ]: In standby mode, press to send caller ID at selected signaling mode, in transmit mode, press to send repeat activate signaling.

[ **MONI** ]: Press to turn on or turn off the squelch.

[ **V/M** ]: Press to select radio mode. Hold on for seconds to select power output at this mode.

[ **EXIT** ]: Press to exit function menu setting. In standby mode, press to select A, B, C, D frequency.

[ **FM** ]: Press to enter and exit FM radio function.

Coder/Function Key: Press to enter menu function setting mode. Hold on for seconds to exit function setting mode.

## Read and Write the Password Function

Choose a password, reading, and writing (set password, please remember, once set, after software to read and write all need password to work)

## LCD Description

Top place show spec at present working frequency/channel mode.

Addition transmit frequency under frequency mode.

Present channel have available DTMF signaling.

Present channel at High output power mode.

Present channel have set CTCSS.

Shows the radio if at correct working.

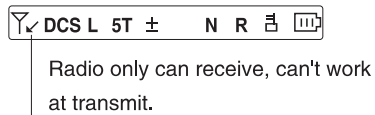

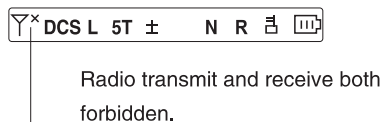

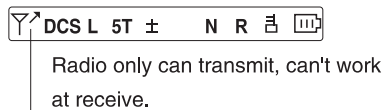

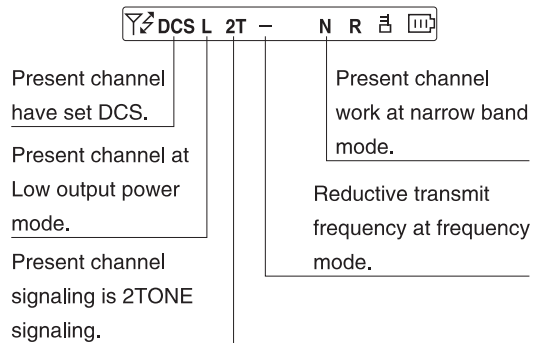

Present channel scrambler available.

Present channel work at wide band mode.

Shows present transmit and receive frequency reversal.

Shows keypad is locked.

Shows battery capability.

## ■ SAME TX RX FREQUENCY, DIFFERENT TX RX FREQUENCY CHANNEL MEMORY

### Same TX RX frequency channel memory

- ① Use keypad write require frequency, for example 462.5625, press microphone **[MENU]** key ( or Progress/confirm key)
- ② Menu select 44.
- ③ Press microphone **[MENU]** key ( or Progress/confirm key) to select channel 050. Press **[MENU]** key (or Progress/confirm key) again to memory it to CH-050 .

If before setting already shows CH-050 (not 001) means channel 1 is memorized.

Delete this memorized channel: select menu 45, press **[MENU]** key (or Progress/confirm key), select channel CH-050 press **[MENU]** key (or Progress/confirm key) again to delete, LCD shows

050 is empty channel.

- ④ Press **[MENU]** key (or Progress/confirm key) to memory it, LCD shows CH-050.
- ⑤ Press **[MENU]** key (or Progress/confirm key) back to main menu, select 27, A- channel setting the frequency, channel number, channel name, press **[MENU]** key (or Progress/confirm key) to confirm.
- ⑥ Same use menu 28, 29, 30 to setting the B, C, D frequency.
- ⑦ Hold on the **[MENU]** key (or Progress/confirm key) for seconds to exit. Or **[EXIT/AB]** key.
- ⑧ At frequency mode, press **[MENU]** key enter or exit the channel.

### Different TX RX frequency channel (CTCSS/ DCS) memory (connect repeater)

- ① Press **[MENU]** key (or Progress/confirm key), select menu 10.

- ② Press **[MENU]** key (or Progress/confirm key), setting the receive DCS figure.
- ③ Press **[MENU]** key (or Progress/confirm key) to confirm.  
select menu 11 to setting the receive CTCSS
- ④ Press **[MENU]** key (or Progress/confirm key), setting the receive CTCSS figure.
- ⑤ Press **[MENU]** key (or Progress/confirm key) to confirm.  
Select menu 12 setting transmit DCS.
- ⑥ Press **[MENU]** key (or Progress/confirm key), to setting the transmit DCS figure.
- ⑦ Press **[MENU]** key (or Progress/confirm key) to confirm.
- ⑧ Select menu 13. Press **[MENU]** key (or Progress/confirm key) to select transmit CTCSS figure.
- ⑨ Press **[MENU]** key (or Progress/confirm key) to confirm.
- ⑩ Press **[EXIT]** to exit.

If no need DCS/CTCSS then no then these steps.

Use microphone keypad press require frequency, for example 462.7125.

- ① Press microphone **[MENU]** key (or Progress/confirm key) enter menu.
- ② Menu select 44.
- ③ Press microphone **[MENU]** key (or Progress/confirm key) to select channel 051. Press **[MENU]** key (or Progress/confirm key) again to memory it to CH-051. If before setting already shows CH-051 (not 051) means channel 2 is memorized.  
Delete this memorized channel: select menu 45, press **[MENU]** key (or Progress/confirm key), select channel CH-051 press **[MENU]** key(or Progress/confirm key) again to delete, LCD shows 051 is empty channel.
- ④ Press **[MENU]** key (or Progress/confirm key) to memory it, LCD shows CH-051.
- ⑤ Press **[EXIT/AB]** key to exit.  
Microphone press frequency for example 430.6250.

- ⑥ Press microphone **[MENU]** key (or Progress/confirm key) select menu 44.
- ⑦ Press **[MENU]** key (or Progress/confirm key) select channel CH-051.
- ⑧ Press **[MENU]** key (or Progress/confirm key) memory this frequency to transmit channel.  
Back to main menu, select 27, A–channel setting the frequency, channel number, channel name, press **[MENU]** key (or Progress/confirm key) to confirm.
- ⑨ Same use menu 28, 29, 30 to setting the B, C, D frequency.
- ⑩ Hold on the **[MENU]** key (or Progress/confirm key) for seconds to exit. Or **[EXIT/AB]** key.  
At frequency mode, hold on **[MENU]** key for seconds to enter or exit channel.

## ■ MENU FUNCTION SETTING OPERATION

### Operation For Manual Channel Memory And Delete

#### Channel memory:

1. Directly input frequency by keypad under frequency mode. Example: 435.125 MHz input 4,3,5,1,2,5.
2. Setting CTDCS frequency (manual page 10, 11). Setting transmit CTDCS frequency (manual page 12,13). For example: receive CTDCS 67.0HZ, transmit CTDCS 67.0HZ. Press **[MENU]** Key + **[1]** Key + **[1]** Key + **[MENU]** + **[UP]** Key. Select 67.0HZ + **[MENU]** Key.  
Transmit CTDCS 67.0HZ. Press **[MENU]** Key + **[1]** Key + **[3]** Key + **[MENU]** + **[UP]** Key. Select 67.0HZ + **[MENU]** Key. Press **[MENU]** Key again to save and exit. (If no need CTDCS all select OFF)
- 3 Select manual 44 to memory the channel, press **[MENU]** Key + **[4]** Key + **[4]** Key + **[MENU]** Key +

**[UP]** (DOWN) select channel + **[MENU]** Key to memory the channel information.

#### Delete channel:

Select menu 45. Press **[MENU]** + **[4]** + **[5]** + **[MENU]**+ **[UP]** (DOWN) select the channel number + **[MENU]** Key to delete.

#### Preconfigured Channels 1-7

According to GMRS, Channels 1...7 are limited for a maximum output power of 5W with a bandwidth of 20kHz.

Channel	Frequency	Name
1	462.5625 MHz	GMRS-1
2	462.5875 MHz	GMRS-2
3	462.6125 MHz	GMRS-3
4	462.6375 MHz	GMRS-4
5	462.6625 MHz	GMRS-5
6	462.6875 MHz	GMRS-6
7	462.7125 MHz	GMRS-7

#### Preconfigured Channels 8-14

Channels 8...14 are receive only channels with a bandwidth of 12.5kHz

Channel	Frequency	Name
8	467.5625 MHz	GMRS-8
9	467.5875 MHz	GMRS-9
10	467.6125 MHz	GMRS-10
11	467.6375 MHz	GMRS-11
12	467.6625 MHz	GMRS-12
13	467.6875 MHz	GMRS-13
14	467.7125 MHz	GMRS-14

## Preconfigured NOAA Channels

Channels CH190 up to CH199 are preassigned for NOAA-reception and may not be altered by the user.

Channel	Frequency	Name
190	162.5500 MHz	NOAA 1
191	162.4000 MHz	NOAA 2
192	162.4750 MHz	NOAA 3
193	162.4250 MHz	NOAA 4
194	162.4500 MHz	NOAA 5
195	162.5000 MHz	NOAA 6
196	162.5250 MHz	NOAA 7
197	161.6500 MHz	NOAA 8
198	161.7750 MHz	NOAA 9
199	161.7500 MHz	NOAA 10

## Memory FM Radio Channel

Use PC software to edit FM radio channel. (Software FM option). Under transmit send DTMF code by microphone keypad. Press microphone [\*] Key to search FM channel under FM mode.

## Keypad Lock-out

Hold the microphone [#] key for 2 seconds at standby to turn on/off the keypad lock-out function.

## Transmit Transit Signal

Select transit signal frequency (out radio have 4 kind transit signal frequency). Press [MENU] + [5] + [0] + [MENU] + [UP](DOWN) select transit signal frequency + [MENU] key to save setting. Hold [PTT] and press [CALL] Key to transmit setting transit signal.

## PTT ID Setting

Use PC software to edit PTT-ID code.

1. Manual 18, select signal. Press [MENU] + [1] + [8] + [MENU] + [UP](DOWN) select signal + [MENU] save the setting.
2. Manual 20, setting PTT launch. Press [MENU] + [2] + [0] + [MENU] + [UP](DOWN) select signal + [MENU] save the setting.
3. Manual 21, setting PTT transmit delay time. Press [MENU] + [2] + [1] + [MENU] + [UP] (DOWN) select delay time + [MENU] save the setting.
4. Press [PTT] to send setting ID code.

## Optional Signalling Setup

### DTMF Signalling Setup

This radio is capable of DTMF encode/decode feature, users can program the desired DTMF code by PC program.

## DTMF Signalling

If the radio is pre-programmed with DTMF signalling code, when it receive a matched code it will alert and display the corresponding code, also radios can communicate with each other in valid time. (ID code is programmable by PC software)

## Patrol Function

When receiving matched DTMF signalling which is same as pre-programmed patrol code, the radio will emit self ID code which will display on master control radio.

This function is able to select to be or not to be controlled by master ID code, this function is not controlled by RX signalling. (Patrol code is programmable by PC software)

## Monitor Function

When receiving matched DTMF signalling which is same as pre-programmed monitor code, the radio will transmit to monitor the surrounding voice. This function is able to select to be or not to be controlled by master ID code, this function is not controlled by RX signalling. (Monitor code is programmable by PC software)

## Remote Stun

When receiving matched DTMF signalling which is same as pre-programmed remote stun code, transmitting is disabled, it will also alert on the display mode. The radio will restore to work normally only after remote revived. This function is able to select to be or not to be controlled by master ID code, this function is not controlled by RX signalling. (Remote stun code is programmable by PC software)

## Remote Kill

When receiving matched DTMF signalling which is same as pre-programmed remote kill code, transmitting, receiving and all activities will be disabled, it will also alert on the display mode. The radio will restore to work normally only after remote revived. This function is able to select to be or not to be controlled by master ID code, this function is not controlled by RX signalling. (Remote kill code is programmable by PC software)

## Remote Revive

When receiving matched DTMF signalling which is same as pre-programmed remote revive code, the radio will be revived and restore to work normally. This function is able to select to be or not to be controlled by master ID code, this function is not controlled by RX signalling. (Remote revive code is programmable by PC software)

## Emergency Alarm

When receiving matched DTMF signalling which is same as pre-programmed emergency alarm code, the radio will emit emergency alarm. Emergency alarm mode and channel is PC programmable. This function is not controlled by master ID code and RX signalling. (Emergency alarm code is programmable by PC software)

Signalling controlled by master ID: Function will be implemented only when both signalling and mater ID matched.

Signalling no controlled by master ID format: signalling + # + Information Code

Signalling controlled by master ID format: signalling + # + Master ID code + # + Information Code

## DTMF Transmit By Call Key Setting

1. Select DTMF signal, press **[MENU]** + **[1]** + **[8]** + **[MENU]** + **[UP]** (DOWN) select DTMF signal + **[MENU]** save setting.
2. Select signal information code. Press **[MENU]** + **[2]** + **[2]** + **[MENU]** + **[UP]** (DOWN) select decode signal information code group (1–15) + **[MENU]** save the setting. (Can use PC software set DTMF code).
3. Press **[Call]** Key transmit selected DTMF code group at standby.

## 2 TONE And 2 TONE Signal Transmit by Call Key Setting

1. Press **[MENU]** select 18 OPTSIG, press **[MENU]** select 2 TONE function.
2. Press **[MENU]** select 22 S-INFO, press **[MENU]** select pre-code signal group (1–16). (Can use PC software setting 2 TONE).
3. Corresponding function will turn on when receive 2 TONE signal is same as pre-set 2 TONE code.

4. Press **[Call]** to send 2 TONE group code at standby.

## 5 TONE Signal Setting

This radio have 5 TONE coding/decode function. You can use PC software to input signal information code. (enter software signal edit select 5 TONE and setting). Receiver set 5 TONE signal, then after receive same 5 TONE signal (code must 5 bit) receiver turn on the ring function and display the information code. Speech at effective time is available. (ID code can use PC software to setting).

Press **[Call]** Key to transmit 5 TONE.

1. Press **[MENU]** key, select 18 OPTSIG press **[MENU]** select 5 TONE function, press **[MENU]** to confirm setting.
2. Press **[MENU]** , select 22 S-INFO press **[MENU]** key to select pre-code signal group 1-15. (Can use PC software setting 5 TONE information code, each group can transmit 3 group 5 TONE code for optional).

3. Press **[Call]** key transmit pre-set 5 TONE code group at standby.

## ■ SPEAKER MICROPHONE DESCRIPTION (optional)

- ① "MENU": Function key
- ② "UP": Tune up channel step
- ③ "DOWN": Tune down channel step
- ④ "EXIT": Exit A/B channel switch, emergency alarm etc.
- ⑤ "\*/SCAN": Offset function, scan, digital "\*"
- ⑥ "#/LOCK": Keypad lockout function, digital "#"
- ⑦ "0": Number 0
- ⑧ "1": Number 1
- ⑨ "2": Number2
- ⑩ "3": Number3
- ⑪ "4": Number4
- ⑫ "5": Number5
- ⑬ "6": Number6
- ⑭ "7": Number7
- ⑮ "8": Number8
- ⑯ "9": Number9

## SPEAKER MICROPHONE DESCRIPTION (optional)

- ① "MENU": Function key
- ② "UP": Tune up channel step
- ③ "DOWN": Tune down channel step
- ④ "EXIT": Exit A/B channel switch, emergency alarm etc.
- ⑤ "\*"/SCAN": Offset function, scan, digital "\*\*"

- ⑯ "9": Number 9

## Microphone Keypad Operation

1. Hold on microphone **[MENU]** key for seconds can switch select channel mode or frequency mode.
2. Press **[#]** key to switch High/Low transmit output power.
3. Hold on **[#]** key for seconds to Lock/Unlock the keypad.
4. Hold on **[EXIT/AB]** key for seconds to active Alarm mode.
5. Press **[EXIT/AB]** key select present working frequency.
6. Press **[\*]** key to reverse the transmit frequency and receive frequency.
7. Hold on **[\*]** key to start Scan function.
8. Hold on **[0]** key for seconds, to display present power supply voltage

## ■ FUNCTION MENU

Menu	Primary Menu Icon	Secondary Menu Icon	Secondary Function Description

47	OFFSET		Offset frequency range is 00.000-69.990MHz selective. In VFO mode, the offset between TX and RX
48	ANI		ANI code, programmed by PC software only
49	ANI-L	3, 4, 5	Length of ANI code
50	REP-S	1000	Transmitting press CALL to send 1000Hz to activate repeater function
		1450	Transmitting press CALL to send 1450Hz to activate repeater function
		1750	Transmitting press CALL to send 1750Hz to activate repeater function
		2100	Transmitting press CALL to send 2100Hz to activate repeater function
51	REP-M	OFF	Disable repeater transponder function
		CARRI	Repeater transpond when receiving matched carrier
		CTDCS	Repeater transpond when receiving matched CTCSS/DCS
		TONE	Repeater transpond when receiving matched tone
		DTMF	Repeater transpond when receiving matched DTMF code
52	TMR-MR	OFF, 1, 2, 3, ... 50	Delay time for main frequency back, at multi standby
53	STE	OFF	Disable squelch tail-eliminated function
		ON	Enable squelch tail-eliminated function

54	RP-STE	OFF, 1, 2, 3, ...10	1-10 indicate squelch tail length, used to eliminate squelch tail noise produced
55	RPT-DL	OFF, 1, 2, 3, ...10	1-10 select delay time to receive repeater tail noise
56	DTMF-G	0, 1, 2, 3, ... 60	Set DTMF gain
57	PONYEY	OFF	manual power on/off (long press of volume knob)
		ON	automatic power on/off
58	RESET	VFO	Reset the menu mode to factory default setting
		ALL	Reset all memories and other setting to factory default setting

### Supported CTCSS and DCS codes

The DB25-G does support the following CTCSS and DCS codes for encoding and decoding.

## ■ GENERAL SPECIFICATIONS

### General Specifications

Frequency range	TX: GMRS RX: 136-174MHz/ 400-480MHz
Channel capacity	200 channels
Channel Spacing	25KHz / 12.5KHz
Channel step	2.5KHz / 5KHz / 6.25KHz / 10KHz / 12.5KHz / 25KHz
Working Voltage	13.8V DC $\pm$ 15%
Squelch way	CARRIER / CTCSS / DCS / 5Tone / 2Tone / DTMF
Frequency stability	$\pm$ 2.5ppm
Operating temperature	-20~+60°C
Dimension	98 ( W ) x 44 ( H ) x128 ( D ) mm
Weight	448g

### Receiver (ETSI EN 300 086 Standardized.Test)

	Wide Band	Narrow Band
Sensitivity	$\leq$ 0.25 $\mu$ V	$\leq$ 0.35 $\mu$ V
Adjacent Channel Selectivity	$\geq$ 70dB	$\geq$ 60dB
Intermodulation	$\geq$ 65dB	$\geq$ 60dB
Spurious Rejection	$\geq$ 70dB	$\geq$ 70dB
Audio response	+1~-3dB (0.3~3KHz)	+1~-3dB (0.3~2.55KHz)
Hum & Noise	$\geq$ 45dB	$\geq$ 40dB
Audio Distortion	$\leq$ 5%	
Audio output power	$\geq$ 2W@10%	

### Transmit (ETSI EN 300 086 Standardized.Test)

	Wide Band	Narrow Band
Output power	5W/ 25W GMRS	
Modulation Mode	16K $\Phi$ F3E	11K $\Phi$ F3E
Adjacent Channel Selectivity	$\geq$ 70dB	$\geq$ 60B
Hum & Noise	$\geq$ 40dB	$\geq$ 36dB
Spurious Emission	$\geq$ 60dB	$\geq$ 60dB
Audio response	+1~-3dB (0.3~3KHz)	+1~-3dB (0.3~2.55KHz)
Audio distortion	$\leq$ 5%	

Attention: Above specifications are subject to change without any notice due to technology enhancement.

## Appendix A. - GMRS Frequency Chart (MHz)

CH.No	CH.Freq.(MHz)	Name	CH.No	CH.Freq.(MHz)	Name
1	462.5625	GMRS-1	12	467.6625	GMRS-12
2	462.5875	GMRS-2	13	467.6875	GMRS-13
3	462.6125	GMRS-3	14	467.7125	GMRS-14
4	462.6375	GMRS-4	15	462.5500	GMRS-15
5	462.6625	GMRS-5	16	462.5750	GMRS-16
6	462.6875	GMRS-6	17	462.6000	GMRS-17
7	462.7125	GMRS-7	18	462.6250	GMRS-18
8	467.5625	GMRS-8	19	462.6500	GMRS-19
9	467.5875	GMRS-9	20	462.6750	GMRS-20
10	467.6125	GMRS-10	21	462.7000	GMRS-21
11	467.6375	GMRS-11	22	462.7250	GMRS-22

\* Channels 8~14 are low-power FRS license free channels.

CH.No	CH.Freq.(MHz)	Name	CH.No	CH.Freq.(MHz)	Name
23	462.5500 / 467.5500	RPT-1	27	462.6500 / 467.6500	RPT-5
24	462.5750 / 467.5750	RPT-2	28	462.6750 / 467.6750	RPT-6
25	462.6000 / 467.6000	RPT-3	29	462.7000 / 467.7000	RPT-7
26	462.6250 / 467.6250	RPT-4	30	462.7250 / 467.7250	RPT-8
