Introduction

Congratulations on your purchase of the FX Numeric Display Pager! This compact state-of-the-art pager can store and display 30 messages of up to 24 digits each.

The FX Pager has *Quick View* and *Auto-Hyphen* for easy viewing of messages. Other features include

- User-Programmable Message Tags
- Time Stamp/Message Number Display for stored messages
- Multiple Alert Tones
- Silent (Vibrate) Alert
- 24-Hour Clock
- Daily Alarm
- Display Light

To ensure that you understand all of the pager's features and capabilities, please read this Operating Guide carefully before you use the pager.

Pager Controls

Side Key—Turns the pager on and off. See "Turning the Pager On and Off" on Page 6.

Forward and Mode Keys—Used separately and together as described in this Operating Guide, these keys control all of the pager's many features.

Display Indicators

12-Character Display—Displays menu items, message tags, status indicators, and incoming messages.

Alert Mode Indicator—Shows the audio alert mode is selected. If the pager is in the silent (vibrate) mode, this indicator does not appear.

Alarm Indicator—Appears when the alarm is turned on.

Turning the Pager On and Off

To turn on the pager, press  and you see the standby display.

- Standby display **without** messages stored in memory
- Standby display **with** messages stored in memory

When you turn on the pager, it sounds test tones (or gives test vibrations) and scrolls through a series of test displays to show you it is working properly.

See "Setting the Alert Mode and Duration" on Page 21 and "Selecting the Alert Tone" on Pages 23 and 24.

To turn off the pager, press and hold down  until you see the power off display (only the current time).

Receiving and Displaying Messages

Pager operation for receiving messages varies depending on whether Quick View is on or off. The default setting is Quick View off. See "Turning Quick View On or Off" on Pages 25 and 26.

Notes:

- Depending on pager setup, message *elements* can include the Time Stamp (and message number), a Message Tag, and the actual message. See "Turning the Time Stamp On or Off" on Pages 33 and 34 and "Message Tags" on Page 39.

MSG 1 08139A

Time Stamp (Optional)

-0-URGENT

MessageTag (Optional)

214-555-1212

Actual Message (Part 1)

2104

Actual Message (Part 2)

- Press ◀ or ● to stop the pager alert and cancel the *unread message reminder* for the current message. See "Unread Message Reminder" on Page 17.

- At the end of a message, the display automatically returns to standby if you don't press any key for eight seconds. Four small zeros indicate messages are stored in memory.
- If you press  once to view a message that contains more than one display full of information, or that contains multiple message elements, the pager automatically scrolls through all message elements. The display changes every eight seconds. Then, the standby display automatically returns.

◀ 0000 12113P

Receiving Messages

with Quick View On

1. When the pager receives a message, it beeps or vibrates. Press ◀ or ● to stop the alert.
2. Whether or not you press any key, the message automatically appears.

A rectangular display box containing the number 3214444.

Typical Message

Once you press a button, the message scrolls through all its elements and the display returns to standby.

3. All message elements scroll on the display with the screen changing every eight seconds.

A rectangular display box containing the text MSG 1 08139A.

Time Stamp (Optional)

A rectangular display box containing the text --0--URGENT.

MessageTag (Optional)

A rectangular display box containing the text 214-555-1212.

Actual Message (Part 1)

A rectangular display box containing the text 2104.

Actual Message (Part 2)

Notes:

- If you don't press any key, the message continues scrolling. Three minutes later, the pager beeps (or vibrates) to remind you of the message. This *unread*

message reminder repeats
up to 10 times.

If you receive another
message during this time, the
first message is stored and
the new message scrolls.

- To read the message again, press  as needed.

Receiving Messages

with Quick View Off

1. When the pager receives a message, it beeps (or vibrates) and **CALL** appears on the display. Press any key to stop the alert tone.

A rectangular display box with a thin border. Inside, the word "CALL" is on the left and the alphanumeric string "08139A" is on the right.

2. Press  to view the message. Press  again, if there are other elements (Time Stamp or Message Tag) in the message.

A rectangular display box with a thin border. Inside, the text "MSG 1" is on the left and "08139A" is on the right.

Time Stamp (Optional)

A rectangular display box with a thin border. Inside, the text "-0-URGENT" is centered.

Message Tag (Optional)

A rectangular display box with a thin border. Inside, the phone number "214-555-1212" is centered.

Actual Message (Part 1)

A rectangular display box with a thin border. Inside, the number "2104" is centered.

Actual Message (Part 2)

If you don't press any key, the pager beeps (or vibrates) three minutes later, to remind you of the message. This *unread message reminder* repeats up to 10 times. See "Unread Message Reminder" on Page 17.

3. To read the message again, press  as needed.

Receiving an Urgent Message

When Quick View is on, URGENT appears on the display and the message automatically follows.

When Quick View is off, press any key to stop the alert tone or vibration. Then, press ◀ to view the message.

Notes:

- A message is tagged as urgent when the pager's User Message feature is on and the sender begins the message with a special code. See "Message Tags" on Page 39.
- If you set the pager to the audio alert mode and it receives an urgent message, the loud beep tone sound regardless of the alert tone you selected. (See "Selecting the Alert Tone" on Pages 23 and 24.)
- If you set the pager to the silent (vibrate) mode, it vibrates normally when it receives an urgent message.

Freezing the Display

If you want to stop the display from scrolling, simply press and hold down .

Repeated Messages

If a new message is identical to a message already stored in memory, RP and the number of the original message appear as part of the Time Stamp display. See "Turning the Time Stamp On or Off" on Pages 33 and 34.

RP 3 11:15A

Tone-Only Messages

The pager displays **TONE ONLY** when it receives a call without a message. Such a message could be an automatic page from your telephone answering system or simply someone who calls your pager number but does not enter any message.

TONE ONLY

Unreadable Messages

If the pager receives a message that is partially or totally unreadable, each unreadable character is replaced with a lower case 'u.' Such messages can be caused by poor signal conditions.

Reading Stored Messages

The pager stores and numbers up to 30 messages. Messages are arranged from newest to oldest. The oldest stored message is number 1 and so on.

If you delete a message, the remaining messages are renumbered so that there are no gaps in the numbering.

A message can have up to four parts ... the Time Stamp (and message number), a Message Tag, and the actual message ... depending on which pager features are active. Repeatedly press  to move through the messages from newest to oldest.

- Press and hold down  to freeze the display on the current message element.
- When you stop pressing , the pager automatically scrolls through the remaining elements of the current message and returns to the standby mode.

Time Stamp (Optional)

MessageTag (Optional)

Actual Message (Part 1)

Actual Message (Part 2)

- **If the Time Stamp and User Message features are on**, UR appears at the left of the Time Stamp display for an urgent message.

A rectangular digital display with a black border. It shows the text 'UR 3 12100A' in a monospaced font. 'UR' is on the left, '3' is in the middle, and '12100A' is on the right.

- **If the pager receives an urgent message when the Time Stamp is off and User Message is on**, URGENT is displayed as the first element of the message.

A rectangular digital display with a black border. It shows the word 'URGENT' in a monospaced font, centered within the display.

Memory Full Indicator

When the memory is full, FULL appear on the display. If you receive another message the oldest message is automatically deleted.

A rectangular digital display with a black border. It shows the text 'FULL 12134A' in a monospaced font. 'FULL' is on the left, and '12134A' is on the right.

Display Light

Press and hold down  or  for about two seconds to turn on the display light. The light automatically turns off about two seconds after the display returns to standby.

Unread Message Reminder

If you do not read a message when it is received, the pager sounds a tone (or vibrates) once every three minutes to remind you of the message. The tone repeats 10 times, or until you read the message.

Urgent Message Reminder

If you receive an urgent message and do not read it, a loud beep tone sounds every two minutes. This tone sounds every two minutes until you cancel it. See “Canceling the Urgent Message Reminder” on Page 18.

Canceling the Urgent Message Reminder

1. Press  to view the urgent message.

2. Press and hold down 
and  until you hear a short beep.

Deleting Messages

Your pager allows you to delete messages one at a time or to delete all messages at once.

Deleting One Message

Note: You cannot delete an urgent message until you cancel the *urgent message reminder*. See "Canceling the Urgent Message Reminder" on Page 18.

1. Repeatedly press  until you see the message you want to delete.

32 14444

2. Press and hold down  —the display alternates between DELMSG ? and the message.

DEL MSG ?

32 14444

3. While continuing to hold down , press  to delete the message.

DELETED

4. The display automatically returns to standby.

0000 121 13P

Deleting All Messages

Note: If there is an urgent message stored in memory, you cannot delete all messages until you cancel the *urgent message reminder*. See "Canceling the Urgent Message Reminder" on Page 18.

1. Press ●

◀ AUDIO ALERT

or

SILENT ALERT

2. Press ◀

DELETE ALL ?

3. Press and hold down ● —the display alternates between DELETE ALL and ARE YOU SURE ?

ARE YOU SURE

DELETE ALL ?

4. While continuing to hold down ● , press ◀ to delete all messages.

ALL DELETED

5. The display returns to standby.

Setting Up the Pager

This section tells you how to set up the following pager features: Alert Mode & Duration, Alert Tone, Quick View, and Auto-Hyphen.

Setting the Alert Mode and Duration

You can set your pager to give one of eight audio alerts or a silent alert (vibration) when it receives a message. You can also set the pager to give a periodic reminder when a message is not read, or to give a non-stop alert.

Note: You *must* change the alert *mode* to get to the alert *duration* setting. You can change back the alert *mode* setting by repeating this procedure

1. Press ● . The alert *mode* (SILENT ALERT OR AUDIO ALERT) that *is not* currently active appears.

◀ AUDIO ALERT

or

SILENT ALERT

2. Press ● again to select the new alert *mode*. The current alert *duration* setting (REMINDER ? OR NON-STOP ?) appears.

REMINDER ?

or

NON-STOP ?

3. Press  to display the desired alert duration.

REMINDER ?

on

NON-STOP ?

4. Press  to select the new alert duration setting. The pager gives a test alert (tone or vibration).

Message Tags

Your pager comes preprogrammed with six message tags. You cannot change the first tag -0-URGENT but you can reprogram the remaining five.

The preprogrammed Message Tags are

- 0-URGENT
- 1-HOME
- 2-OFFICE
- 3-HUSBAND
- 4-WIFE
- 5-CHILD

If you turn on the User Message feature, the person calling your pager can tag their message by beginning the message with the appropriate code.

Note: Your pager service can change the first character of the codes to any number (0 - 9), #, [,], or * instead of -. Be sure to check with your pager service.

Storing Words in the Message File

You can store new messages in the message file using any touch-tone telephone. You cannot change message ~~0-URGENT~~, but you can replace the other messages with any word up to eight characters.

The following are the special codes for storing messages from a touch-tone telephone.

A=2	H=44	O=666	W=9
B=22	I=444	P=7	X=99
C=222	J=5	R=77	Y=999
D=3	K=55	S=777	Q=1
E=33	L=555	T=8	Z=11
F=333	M=6	U=88	Space=00
G=4	N=66	V=888	

If the word contain two consecutive letters that are entered using the same telephone number key, you must separate the two letters with a single zero. If the next letter uses a different key, the zero is not necessary. For example, storing the message WILLIAM requires the following sequence:

9	4	4	4	5	5	5	0	5	5	5	4	4	4	2	6	
└───┘			└───┘			└───┘			└───┘			└───┘				
W			I			L			L			I			AM

Replacing the Battery

When the battery's power is low, the pager displays **BATTERY LOW** and sounds a four-second soft tone about every 30 minutes. Replace the battery as soon as possible.

BATTERY LOW

Caution: A built-in memory saver holds information in memory for two minutes while the battery is removed. Have a new battery ready to install before you remove the old one.

1. Slide off the battery cover.
2. Remove the old battery and install a fresh AAA battery.

Note: Be sure to observe the **+/-** symbols in the battery compartment.

3. Re-install the battery cover.

Care and Maintenance

- Keep your pager dry. If it gets wet, immediately wipe it dry.
- Use and store your pager only in normal temperature environments.
- Keep your pager away from dust and dirt.
- To clean your pager, wipe it occasionally with a damp cloth. Do not clean it with harsh chemicals or solvents.

FCC Notice

This device complies with Part 15 of the FCC Rules. Operation is subject to the following conditions.

- This device may not cause harmful interference.
- This device must accept any interference received, including any interference that may cause undesired operation.
